

**2nd F3 Meeting Lille-Ghent  
24th March 2015  
Ghent University, BE**

**PROGRAM**

10:30: Paul Hermant : “Hydroxamates as bioactives molecules: ADME properties, inhibitors of ERAPs, Inhibitors of IDE”

11:00: Adrien Herledan : “Thermal Shift Assay Screening”

11:30: Manuel Lasalle : “Optimization and development of novel topical intestinal agonists of the bile acid receptor TGR5 for treatment of diabetes mellitus and associated metabolic diseases.”

12:00: Camille Moreau : “Individualized repurposing, a new opportunity for rare and orphan disease patients.”

13:00 Lunch

15:00: Hugues Prévet : “Design and Synthesis of 3-D fragments for fragment-based drug discovery (FBDD) approaches.”

15:30: Baptiste Villemagne : “Fragment-based design, synthesis and development of inhibitors of the mycobacterial transcriptional repressor EthR. A new approach against tuberculosis.”

16:00: Lab tour

17:00: City tour
